*CPSA is a non-profit, non-party-political membership association founded in 1931 which serves pensioners of all ages, superannuants and low-income retirees. CPSA has 130 branches and affiliated organisations with a combined membership of over 31,000 people living throughout NSW. CPSA's aim is to improve the standard of living and well-being of its members and constituents.*

CPSA appreciates the opportunity to comment on the proposed amendments to the NSW Poisons and Therapeutic Goods Legislation for residential care facilities.

### **1. Emergency use of Schedule 4 and 8 medications**

- a. Available medications: CPSA supports this amendment.
- b. Procurement: CPSA believes that procurement should be undertaken by a Director of Nursing, who is, at minimum, a registered nurse.
- c. Storage: CPSA recommends that Schedule 8 medications be stored separately in a double-locked cabinet to reduce the risk of medication mismanagement.
- d. Administration: CPSA supports this amendment.

### **2. Nurse initiated Schedule 2 and 3 medications**

- a. Procurement: CPSA recommends that a Director of Nursing (who is a registered nurse) be responsible for procurement.
- b. Storage: Schedule 4 and 8 medications should be stored separately to Schedule 2 and 3 medications, in a double-locked cabinet.
- c. Administration: CPSA supports this amendment.

### **3. Resident labelled medications managed by a nurse or carer**

- a. Storage: CPSA does not support the storage of Schedule 4 and 8 medications in dose administration aids. In CPSA's view, these medications should be stored separately and only accessible by a registered nurse.
- b. Administration: Schedule 8 medications should be administered by registered nurse.

CPSA has concerns about the storage and administration of drugs of addiction in dose administration aids (DAAs). DAAs can pose a risk, particularly when medications are not administered by, or under the supervision of, a registered nurse. If there is no registered nurse administering and monitoring the effect of a medication, there is a risk that an adverse reaction to a drug will not be identified by lesser skilled staff.

There can be packaging errors as well. A 2008 study of the packaging of DAAs in 42 NSW nursing homes found packaging incidents in 34 of the facilities at rates between

1% and 54%.<sup>1</sup> Given the high error rate in packaging and the scope for misuse, CPSA believes it would be irresponsible to allow Schedule 4 and 8 medications to be packaged in DAAs and administered with the assistance of non-registered care staff.

c. Recording of administration: CPSA supports this amendment.

#### **4. Schedule 8 drug register recording**

a. Recording requirements: CPSA believes that all Schedule 8 medications should be recorded so as to monitor their use.

#### **5. Reporting of lost or stolen medications**

a. Reporting requirements: CPSA supports this amendment.

#### **6. Disposal of expired, unwanted or unusable medication**

a. Schedule 2, 3, 4 medications: CPSA supports this provision.

b. Schedule 8 medications: CPSA supports this amendment, but calls for its extension to Schedule 8 medications in dose administration aids.
